In your bibliography you will have 1-3 papers that can serve as guideline for your work.

(a) Can you summarize in a couple of sentences what the paper is about?

(b) Can you pinpoint 1- 2 key figures? What do these figures tell? why are these the most important figures?

(c) What is the "new" knowledge in this work?

- dataset: eg deeper, better sampled,... and why is this important
- method: what challenges it solves, how is it validated if it is new
- interpretation: new insights

(d) What would you change from (b), (c)? what are the limitations of this analisis? do you think their statistical methods should be changed or how a parameter is computed?

(e) Which questions are missing to be answered?

Your work

What does your research advances wrt this key bibliography

Can you compare it to these results? if yes how?
